

Case Study - Holywell All Through School

Breathing Buildings helped Flintshire County Council design a hybrid ventilation scheme for the whole school. We then worked with Waterman Group, Walsh Integrated Building Services and Galliford Try to deliver the vision.

PROJECT	Holywell All Through School new building
LOCATION	Holywell, North Wales
SECTOR	Education
FEATURES	Full range of equipment supplied integrating with architectural layout
HISTORY	First design work in 2013; school handed over in September 2016

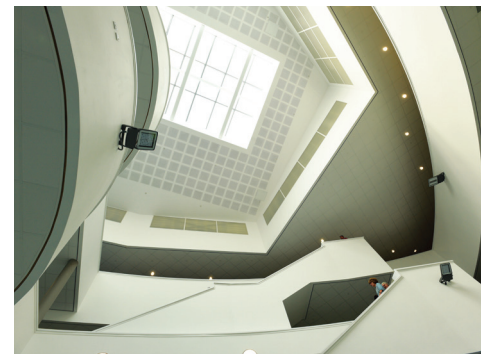

"It was a pleasure to work with Breathing Buildings. The technical support provided at the design stage was second to none. The supply, installation and commissioning of the equipment was well managed and they reacted to the usual site challenges in a timely and professional manner."

- Lee Macnab,
Senior Contracts Manager
Walsh Integrated Building Services Ltd

System description:

Ground and first floors are served with façade systems which also utilise the atrium via cross talk attenuators. The top floor and halls were served via Breathing Buildings' patented

E-Stack® natural ventilation and mixing units. A full design was carried out to demonstrate compliance with the relevant overheating and air quality criteria.
